About Me

MERN Stack and Next.js Developer with over 3 years of experience in building, deploying, and maintaining dynamic web applications. Proficient in JavaScript, React, Node.js, Express, MongoDB, and Next.js. Adept at working in agile environments, collaborating with cross-functional teams, and delivering high-quality solutions. Certified by Pasha and Techlift, demonstrating a commitment to continuous learning. Seeking to leverage my skills to contribute to a forward-thinking organization.

Skills

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Bootstrap, Tailwind CSS
- **Backend:** Node.js, Express.js, RESTful APIs, GraphQL
- **Databases:** MongoDB, Mongoose
- **Tools & Platforms:** Git, GitHub, Docker, AWS, Vercel, Netlify

Education

Master in Computer Science

BZU Multan

2018-2020

Experience

Mern Stack Developer

Eraflip Tech

2023 - Present

- **Full-Stack Development:** Spearheaded the development of six complex web applications from inception to deployment, leveraging the MERN stack (MongoDB, Express.js, React.js, and Node.js).
- **Frontend Development:** Engineered highly responsive and user-centric interfaces using React.js, incorporating state management techniques (e.g., Redux, Context API) to optimize performance and user experience.
- **Backend Development:** Implemented robust and scalable backend services with Node.js and Express.js, architecting RESTful APIs to power data-driven applications.
- **Database Management:** Utilized MongoDB to design, develop, and maintain efficient database schemas, ensuring data integrity and optimal query performance.
- **Agile Development:** Collaborated effectively within agile teams, participating in daily stand-ups, sprint planning, and retrospectives to deliver projects on time and within budget.
- **Technical Documentation:** Maintained comprehensive technical documentation, including API specifications, code comments, and deployment procedures, to facilitate knowledge sharing and future maintenance.
- **Problem-Solving and Troubleshooting:** Actively identified and resolved technical challenges, leveraging debugging tools and problem-solving techniques to minimize downtime and optimize application performance.

Frontend Developer

Axion Solution

-2022 -2023

- **Code Development:** Writing clean, efficient, and well-documented code for various features and functionalities.
- **Bug Fixing:** Identifying and resolving software defects to improve application stability and performance.
- **Testing:** Conducting unit, integration, and end-to-end testing to ensure code quality and functionality.
- **Deployment:** Assisting in the deployment of applications to production environments.
- **Version Control:** Using Git effectively for code management, collaboration, and tracking changes.

Team Contributions:

- **Collaboration:** Working effectively with team members to achieve project goals.
- **Communication:** Clearly communicating technical concepts and ideas to team members and stakeholders.
- **Problem-Solving:** Contributing to problem-solving efforts and brainstorming solutions.
- **Learning and Adaptability:** Staying updated with the latest technologies and trends.

Skills

- Python
- Django
- Shadcn
- MU

Projects:

- E-commerce Website: Developed a robust e-commerce platform, incorporating features like product catalog, shopping cart, secure checkout, and user authentication.
- Online Food Ordering System: Built a user-friendly food ordering platform, integrating with payment gateways and delivery services to provide a seamless user experience.
- Apna Ghar Website: Created a real estate website, featuring property listings, search functionality, and user-friendly interface.
- Real-time Chat Application: Developed a feature-rich chat application using WebSockets, enabling real-time messaging, group chats, and file sharing.
- Learning Management System (LMS): Implemented a comprehensive LMS, including course creation, student enrollment, progress tracking, and video lectures.
